

Seven years ago with the support of the MEDIA Programme of the European Union and the Medienboard Berlin-Brandenburg, CARTOON initiated Cartoon Movie to establish a synergy between distributors, investors and producers and thus accelerate the financing and distribution process of animated features in Europe.

Cartoon Movie was designed along the lines of the successful Cartoon Forum, which aims at facilitating the financing of animation TV series. But Cartoon Movie also offers improvements in the management of cross border film distribution systems in Europe. Distributors in Europe so far did not feel very comfortable about producing projects that did not originate from their own country. Cartoon Movie will eventually change the behaviour patterns and the mentalities within this business sector.

Cartoon Movie is neither a fair nor a festival, but rather a co-production forum where European producers can negotiate the financing of their feature-length projects and provide support to international cooperation. Cartoon Movie combines the trailer presentations, business meetings and screenings with opportunities for socialising.

The **2005 edition** of Cartoon Movie will be held in **Potsdam/Babelsberg** (Germany) between **March 10th and 12th**.
